THE PENINSULAR STOVE COMPANY.

DETROIT CHICAGO BUFFALO

WHEN YOU BUILD, RENT OR BUY

WISH TO BE COMFORT-
ABLE DURING THE
LONG WINTER AND RE-
DUCE YOUR FUEL BILL,

INSIST UPON HAVING
PENINSULAR HOT WATER
AND WARM AIR HEATER
or a PENINSULAR WARM AIR
FURNACE. ❀ ❀ ❀ ❀ ❀ ❀ ❀ ❀ ❀

MOUNTED ON BALL BEARINGS.

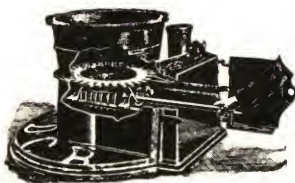

Peninsular Furnaces require no poking, as the annular ring, operating easily at all times, works all consumed substance into basket formed by Duplex Grate.

One operation of the Duplex Grate removes every particle of consumed matter and gives a snapping live fire.

DUPLEX GRATE AND ANNULAR SHAKING RING—COMPLETE

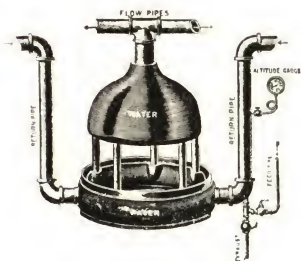

Can be withdrawn through ash pit opening without removing a plate or bolt.

Two Heating Systems at the Cost of One

Can be had in the Peninsular Hot Water and Warm Air Heater.

Combines all the good points of Hot Water or Steam, without the objections of either.

Hot Water Belt and Dome Used
in the
Peninsular Hot Water and Warm Air Heater.

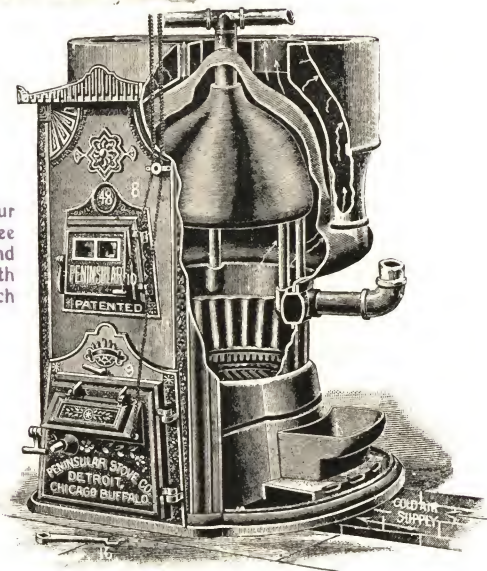

SEND US YOUR PLANS. WE WILL FIGURE THEM
FOR YOU WITHOUT CHARGE.

After a competitive test as to fuel, original cost and durability, the contract for heating and ventilating these modern fire houses was awarded to the makers of Peninsular Hot Water Heaters.

PENINSULAR HOT WATER AND WARM AIR
HEATER WITH LARGE ONE-PIECE COM-
BUSTION DOME AND SELF-CLEANING
RADIATOR. PORTABLE OR BRICK SET.
Series 40, 44, 48, 54, 72. Write for Catalogue.

PENINSULAR PERPENDICULAR TUBULAR FLUE RADIATOR

Is self-cleaning and boiler-like, constructed to radiate the greatest amount of warm air possible in proportion to fire surface.

LARGE ONE-PIECE COMBUSTION DOME

Used only on the Peninsular, nearly doubles the radiation and consumes

all the gases which ordinarily go up the chimney and are wasted.

Peninsular Deep and Roomy Ash Pit

Used on all of our constructions, prevents melting of grates, and large opening makes it easy of access.

Dust Flue and Dust Flue Damper

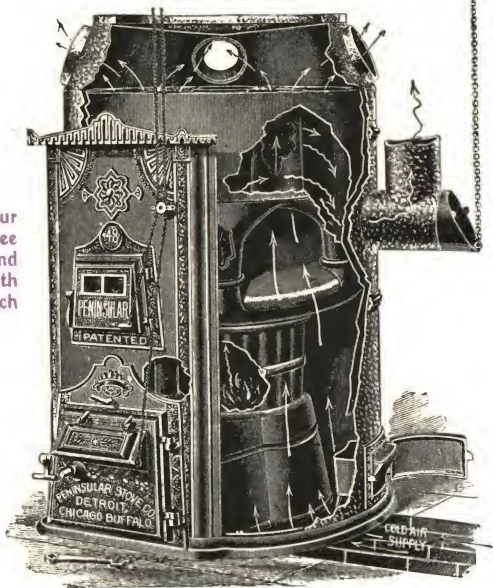

Prevent escape of dust and dirt by drawing them into combustion chamber. Used on all Peninsular Furnaces and Hot Water Heaters.

This residence is heated
and ventilated by a Penin-
sular Warm Air Furnace.

PENINSULAR

CIRCULAR RETURN
FLUE RADIATOR

In which the heat makes a complete circle before reaching smoke pipe, giving forth immense

volumes of pure warm air. Notice the combustion dome in the center that holds the gases and subjects them to intense heat and burns every particle of substance.

Direct Draft Damper

Gives you a quick fire starter, by forming a direct draft from fire to chimney.

Rods on the Outside

Cannot burn off, as they are not exposed to action of fire.

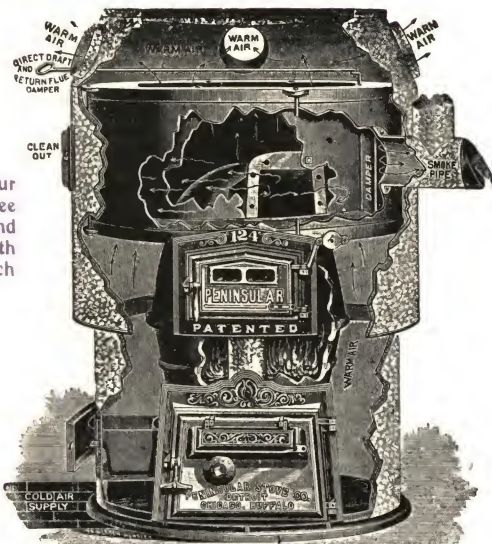

Double Fire Pot

Used on all our furnaces and hot water heaters is practically everlasting.

One church of the
thousands heated
and ventilated by a
Peninsular Warm
Air furnace.

PENINSULAR WARM AIR FURNACE WITH
CIRCULAR RETURN FLUE AND DIRECT
DRAFT RADIATOR. PORTABLE or BRICK SET
Series 122, 124, 127.

Write for Catalogue.

PENINSULAR HOT BLAST ATTACHMENT

Draws the air through blast pipes into and out perforated ring on top of heavy double fire pot. Mixing the superheated air with gases in this way produces perfect combustion and a fierce fire. The only successful method of extracting all the heating quality in soft coal.

Peninsular Patent Gas Ring

Can be attached to any of the Peninsular Furnaces, and so constructed as to produce the greatest possible heat from the least amount of gas. With it you can use either gas or coal.

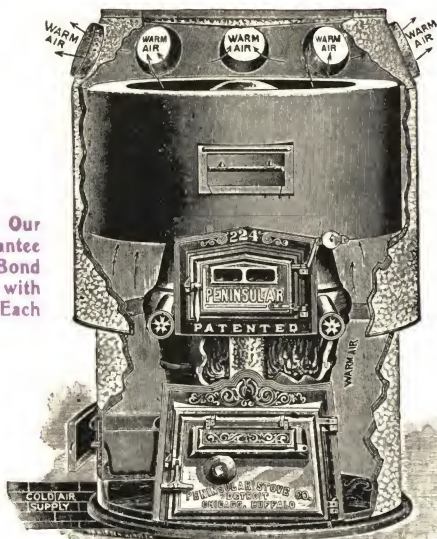

Terrace, containing
forty-eight apart-
ments, heated and
ventilated by Penin-
sular Warm Air
Furnaces.

HOT BLAST AND CIRCULAR FLUE RADI-
ATOR. SOFT COAL. PORTABLE or BRICK SET
Series 222, 224, 227.

Write for Catalogue.

PENINSULAR TRIPPLICATE HEATING SURFACE RADIATOR

Brings in contact with fire three separate heating surfaces in addition to top and bottom of radiator. Two radiators combined in one, in which heat makes complete circuit

of both before reaching smoke pipe. Gives you greater heating capacity than considerably larger size of other makes.

Low Down Furnace

Permits greater elevation of warm air pipes, which greatly augments heating capacity.

For Shallow Cellars

The advantage of this construction is invaluable, as it is the only one made in this way.

Feed Door Opening

Is 10x12 inches, making it especially desirable for any kind of fuel.

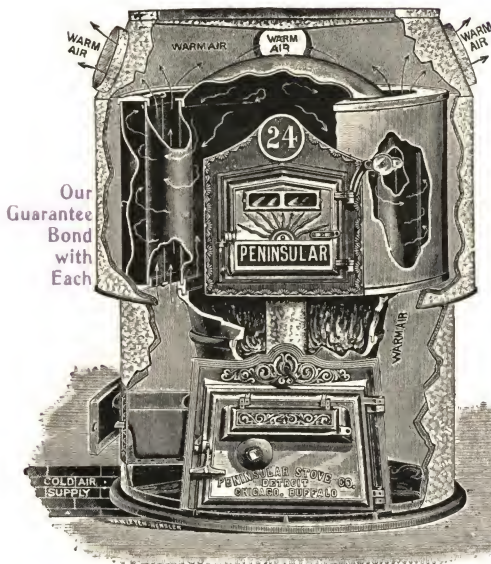

For Soft Coal

Heavy sectional linings extending well upon the inside of inner radiator thoroughly protect it from direct action of fire. Fitted in this way it is designated as Series 720, 722, 724, 727, 730.

These beautiful residences, fitted with all the latest modern conveniences, are heated and ventilated by Peninsular Hot Water Heaters.

"THE BEST."

PENINSULAR WARM AIR FURNACE WITH
TRIPLICATE HEATING SURFACE RADIATOR.
COAL, COKE, WOOD OR NATURAL GAS.
PORTABLE OR BRICK SET.

 } 720, 722, 724, 727, 730.

Write for Catalogue.

WOOD *or* COAL FURNACE

Which works equally well with either, and gives you the immediate and full benefit of fuel. Eighteen inch chunks of wood are the lengths best adapted for use. Notice the size of feed door

Also Heavy Hot Blast Guard.

Water Pan

With all new furnaces is sufficient to effectually moisten the air.

Peninsular Register Wood Grate

In two sections can be dropped in place or removed through feed door of any Peninsular Furnace.

This handsome large residence is only one of the thousands heated and ventilated by a Peninsular Warm Air Furnace.

AND EXTRA LARGE FEED DOOR. WOOD
AND COAL. PORTABLE OR BRICK SET.
Series 522, 524, 527, 530. Write for Catalogue.

MANY SO-CALLED WOOD FURNACES

Have been placed on the market, and are nothing more than a box stove with drum attachment.

Examine Carefully

The cut of the Perpendicular Tubular Flue Radiator used on all Peninsular Wood

Furnaces. Notice the number of tubes and their arrangement. Fire must pass around them all before reaching exit flue. Think of the immensity of radiating surfaces. What then is the result? Volumes of pure warm air.

Corrugated Fire Box

Extends full length and is connected on both sides and center of top by flues with radiator. Grate bars ensure a free draft under and through fire.

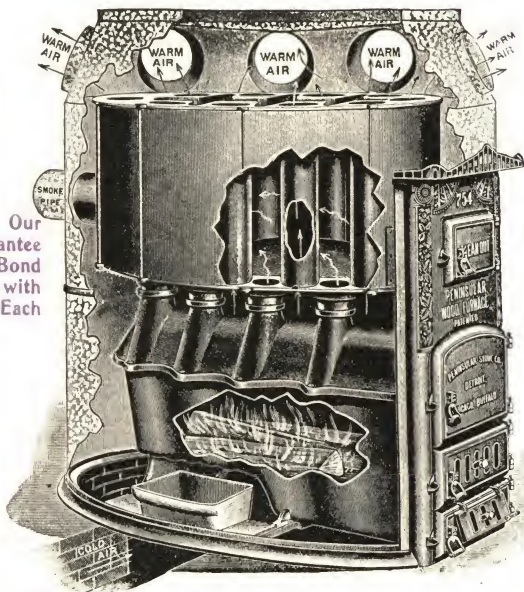

Very Large Double Feed Door

This up-to-date school is
but one of hundreds
heated and ventilated by
Peninsular Warm Air
Furnaces.
